

CRMC's Procedures for Making Retroactive Supplemental Payments to Manville Trust Claimants Who Have Received 5% Initial Pro Rata Payments

Purpose: To pay claimants a supplemental payment due to the increase in the Manville Trust pro-rata percentage.

Population: Any claimant who was paid a 5% pro-rata payment for either a Manville Trust or PACOR claim. For the purpose of processing, this population is sub-divided into three further populations:

- Claimants represented by counsel who receive funds via Electronic Funds Transfer (EFT).
- Claimants represented by counsel who receive funds via Paper Checks.
- Claimants not represented by counsel.

Process:

Guidelines:

- Upon confirmation of a pro-rata increase, CRMC will immediately change the pro-rata payment percentage to reflect the new payment percentage.
- For electronic claims with an outstanding offer the payment percentage will be changed to reflect the new pro-rata payment percentage.
- For paper claims with outstanding checks (5%) will be voided and law firms notified. Claim valuation/payment information for those claims will be updated, based on the new pro-rata payment percentage, and new checks will be re-issued to each law firm for each claimant.
- All pro se claimants with outstanding offers (5%) will be issued a new release with the new payment percentage.
- Law firm administrators will be notified (electronically for e and h filers, spreadsheets for paper filers) within two weeks of the pro-rata increase confirmation of the claimants represented by their law firm, according to CRMC's records. Administrators must certify for each claimant that:
 - 1) They represent the claimant for this Manville settlement and are ready to transmit the increased payment to the claimant or
 - 2) They represent the claimant for this Manville settlement but cannot locate the claimant or potential heirs at this time, so reserve funds for future distribution or
 - 3) They do not represent the claimant for this Manville settlement.

- EFTs/Checks will be issued to the law firm bi-weekly for all claimants certified as #1, above.
- EFTs/Checks will be issued to the firm for claimants in category #2 when the firm certifies that they have been located.
- For claimants certified as #3, above, CRMC will attempt to contact the claimant in order to determine representation.
- Electronic users may make certification submissions at various intervals.
- Counsel will be given 180 days from date of check to disburse the funds.
- All claims will be subject to a random supplemental payment audit.
- After two years, liability will be eliminated from the Trust books.

Processing for each of the three sub-divided populations:

1) Claimants represented by counsel and who receive funds via Electronic Funds Transfer (EFT).

The CRMC will identify the population of claimants to be paid and will forward to counsel payments in the form of an Electronic Funds Transfer (EFT). A message board notice will post which will provide a link to a transmittal notice. This notice will include the payment information for each claimant included in the EFT.

2) Claimants represented by counsel and who receive funds via paper checks.

The CRMC will identify the population of claimants to be paid and will forward to counsel payments in the form of a single check. A transmittal notice will be sent along with the check detailing payment information by claimant.

3) Claimants not represented by counsel.

CRMC will identify the population of pro-se claimants eligible for the supplemental payment PRIOR to issuing a check. The certification process will serve to validate claimants, potential heirs and addresses before disbursing funds. Once the claimant responds, a check will be sent to the appropriate party. If the claimant or PR does not respond within a reasonable timeframe the claim will be flagged, noting that the claimant could not be located; thus making the claimant eligible for the supplemental payment if subsequently located. CRMC will make every effort to locate claimants using internet search engines, personal representative notations, etc.
