

NORTH AMERICAN REFRACTORIES COMPANY ASBESTOS PERSONAL INJURY SETTLEMENT TRUST

Procedures for Supplementing Presumptive NARCO Significant Occupational Exposure

1. Following meetings with Honeywell International Inc. (“Honeywell”), the NARCO Asbestos Trust Advisory Committee (“TAC”), and the NARCO Future Claimants Representative (“FCR”), the Trustees of the NARCO Asbestos Trust adopted presumptive Significant Occupation Exposure occupation and industry combinations, with the industries drawn from the NARCO Trust Distribution Procedures (“TDP”).
2. The Trustees designated the presumptive Significant Occupation Exposure occupation and industry combinations as the “Presumptive SOE Chart.” The NARCO Asbestos Trust published the Presumptive SOE Chart dated October 10, 2013, at www.narcoasbestostrust.org.
3. To add occupations with the TDP- designated industries to the Presumptive SOE Chart, a person may submit a proposal to the NARCO Asbestos Trust which identifies the proposed additional occupation(s) with the TDP-designated industries and provides a written statement of reasons supporting the proposals. The proposal with supporting statement shall be sent by email or regular mail to the Trustees with a copy to Trust counsel Sander Esserman.
4. The Trustees will review the proposal as soon as practicable. If the Trustees find evidentiary or other problems or deficiencies with the proposal, the Trustees will provide the person submitting the proposal with a notice and an opportunity to supplement the proposal. The person submitting the proposal may submit additional evidence or materials within 60 days of the notice.
5. The NARCO Asbestos Trust will forward the proposal with supporting statement to Honeywell, the TAC and the FCR for comment and consultation, with a request that responses to the proposal be provided to the Trustees within 60 days. Honeywell, the TAC or the FCR may request that the Trustees schedule a meeting to discuss the proposal.
6. The NARCO Asbestos Trust will also forward the proposal to the Trust’s claims facility, consultants and counsel for analysis and comment.
7. Following the consultation process with Honeywell, the TAC and the FCR, the Trustees will decide whether to adopt the proposed additions. The Trustees will inform the proponent, Honeywell, the TAC and the FCR of their decision. The Trustees will publish any additions to the Presumptive SOE Chart at www.narcoasbestostrust.org.
