

Manville Trust list of acceptable Medical Language for Pleural Disease

This list represents the most common language used in medical documents for the findings of pleural disease.

Apical Pleural Thickening
Blunting of the Costophrenic Angles
Calcification of the pleura
Calcification of the lining of the lungs(s)
Calcified diaphragmatic plaques
Calcified pleural densities
Calcified plaques
Calcified pleura
Changes in/of the pleural
Changes of the lining of the lung
Chronic Asbestos-related effusion
Densities of the pleura
Diaphragmatic scarring
Diaphragmatic calcification
Diaphragmatic pleural fibrosis
Diaphragmatic plaques
Diffuse pleural thickening
Fibrotic changes of/in the pleura
Fibrotic changes of the lung lining
Fibrotic densities of the pleura
Fibrotic pleural plaques
Fibrotic calcification of the pleura
Nodular pleural thickening
Pleural abnormalities
Pleural adhesions
Pleural calcification
Pleural changes
Pleural effusions
Pleural fibrosis
Pleural markings
Pleural opacities
Pleural plaque(s)
Pleural scarring
Pleural thickening
Scarring of the pleura
Thickening of the Costophrenic Angles
