

Release Version Notes

The C. E. Thurston & Sons Asbestos Trust has two different releases.

- The Release document (currently Rev1) is to be used only by those claimants who are have filed a signed paper claim.
- Electronic and hybrid filers must use the combination Release and Affirmation, which is to be generated online by claimant's counsel after an offer has been made. The applicable data for that claim will be automatically inserted into the form.

In either case, the properly executed document must be submitted to CRMC before a payment will be made.
