**PART 4: EXPOSURE TO MANVILLE ASBESTOS**

To qualify for any Disease Level, the claimant must demonstrate a minimum exposure to an asbestos-containing Manville product prior to December 31, 1982 together with additional asbestos exposure requirements where applicable.

**EXPOSURE HISTORY**

The following definitions must be used to indicate how exposure was obtained for each period of employment. As used here, on a “regular basis” means every workday for a substantial part of the workday.

- (i) handled raw asbestos fibers on a regular basis
- (ii) fabricated asbestos containing products so that the claimant in the fabrication process was exposed on a regular basis to raw asbestos fibers
- (iii) altered, repaired or otherwise worked with an asbestos containing product such that the claimant was exposed on a regular basis to asbestos fibers
- (iv) was employed in an industry and occupation such that the claimant worked on a regular basis within 10-20 feet of workers engaged in the activities described in (i), (ii) and or (iii)
- (v) Exposed other than by (i), (ii), (iii) or (iv)

Completing **Part A** of this section is necessary only when the claimant is alleging an asbestos-related disease resulting from exposure to an occupationally-exposed person. In other words, exposure to asbestos was secondary, as in the case of a family member.

**Completing Part B of this section is mandatory.** It reflects all periods of exposure to asbestos by an occupationally, or directly, exposed person. If Part A is completed, Part B must contain the exposure information of the individual that was occupationally, or directly, exposed to the asbestos product(s).
